

HIGHLY SECURE HEALTH CARE DATA EXCHANGE

SDS - SECURE DATA SPACE

Maximum Security. Individual Branding. Centralized Administration.
The standard backend for simple and secure file exchange.

STATEMENT ON THE CURRENT SITUATION

Also your data is endangered by hacker attacks and espionage

*„There are two types of companies:
those that have been hacked,
and those who don't know they have been
hacked.“*

John Chambers, CEO Cisco (1995-2015)

THE SOLUTION: SDS

Enterprise file sync and share

SDS - WHAT MAKES THE DIFFERENCE:

- ✓ Maximum of data security
- ✓ Individual branding
- ✓ Central administration and role concept
- ✓ Ready to use as an on-premise or cloud solution

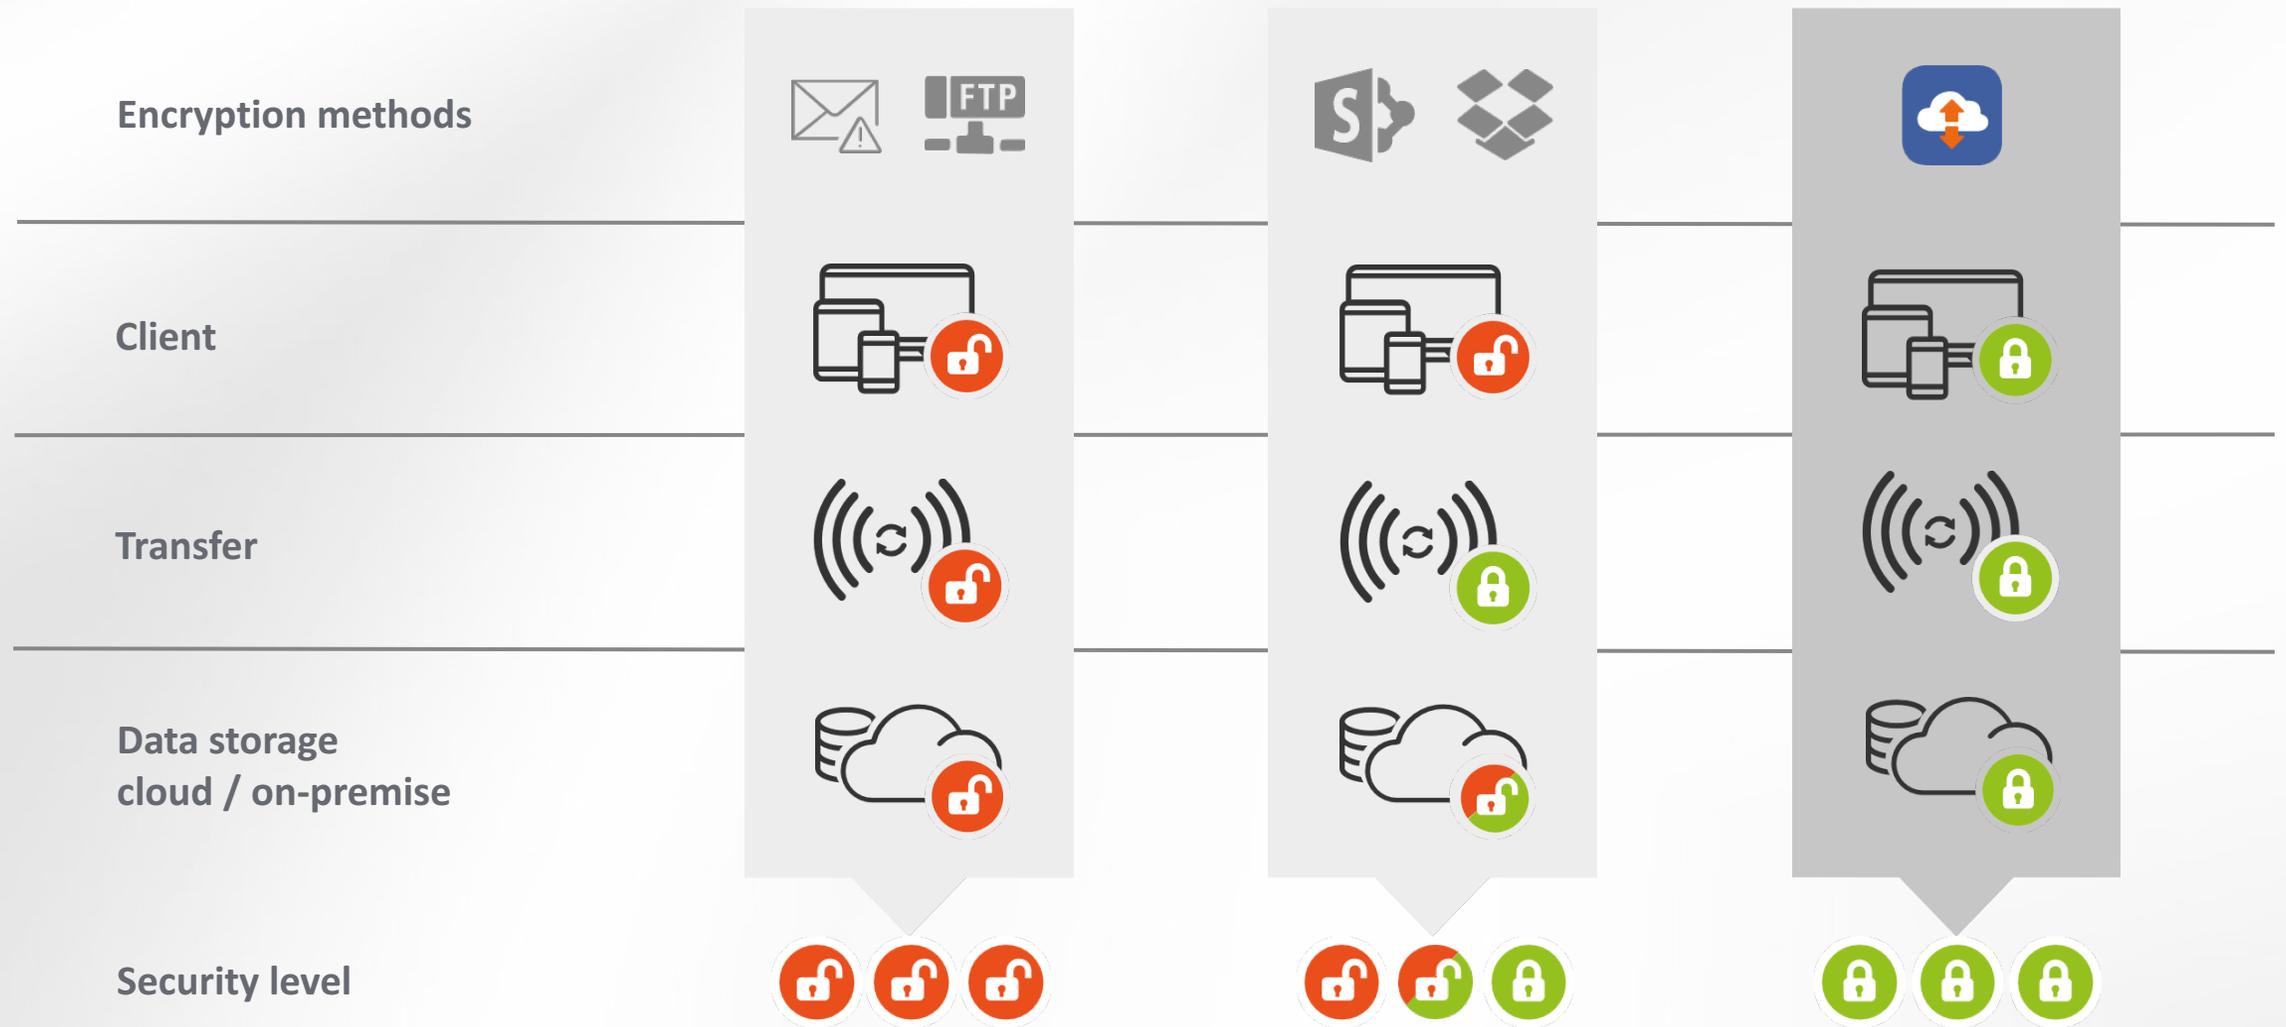

OTHER TOP FEATURES:

- ✓ Easy data exchange in the team or with partners
- ✓ Intuitive operation
- ✓ Platform independent access
- ✓ Seamless integration via open interfaces
- ✓ Made & hosted in Germany

A MAXIMUM OF SECURITY

Only a client-side encryption is compliant with data protection specifications and regulations in the EU

CENTRALIZED ADMINISTRATION TO KEEP UP THE COMPANY POLICY

Current data exchange needs an intelligent user and rights management

Task/Role				
	Data Space Admin Central admin function	Data Room Admin Admin for Data Room	Data Room User Typical user	Link receiver Temporary user
Global system settings				
Global user management				
Creating new <i>Data Rooms</i> and assignment to <i>Data Room Admins</i>				
Rights and user administration in <i>Data Rooms</i>				
<i>Secure Private Room</i> function				
Upload, delete and send files				
Benefits of download and upload links

THE IDEAL SOLUTION FOR EACH COMPANY

The SDS is available in different variants

- › **Windows or Linux server on premise**
- › **Cloud service**
- › **White Label / OEM variant** for providers and cloud service providers as a multitenant EFSS platform

On-premise
e.g. in your own data center

✓ **Training effort for administration about 0,5 days**

✓ **Installation effort about 1 day**

Cloud service
provided by local, national or international data centers

✓ **Ready to use immediately**

MADE &
HOSTED IN
GERMANY

PLATFORM INDEPENDENT ACCESS WITHOUT RESTRICTIONS

Supported clients

Common web browsers

- › Chrome
- › Internet Explorer
- › Firefox
- › Safari

Web Client

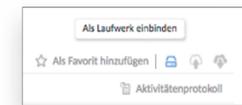

Drive-Mapping via WebDAV or DriveLetter

- › Windows
- › MAC OS
- › Linux

Sync Client

Apps

- › Android
- › iOS
- › Blackberry
- › Windows Phone

We use the SDS ...

- › to share patient data national and abroad in a comfortable and secure way.
- › to securely provide relevant recipients with documents and findings of patients via download links
- › for the transfer of data, like MRT files, DICOM files, pictures, videos, etc. because there is no limitation of the transferable file size.
- › for encrypted providing of mail attachments to the recipients.
- › to be able to collaborate in international research teams via shared Data Rooms.

Klinikum rechts der Isar

CLOUD STORAGES

Comparison matrix

Features	Secure Data Space	Box.com	ownCloud Enterprise	Brainloop	Dropbox Business	OneDrive for Business
Cloud and on-premise operation	✓	-	✓	-	-	-
Client-sided encryption	✓	-	-	-	-	-
Full branding	✓	Logo upload	-	-	-	Partly, html
Origin / legal area	DE	US	US	DE	US	US
Data centers	DE, AT	US	-	DE, US, LUX, CH	US, IRL	US, IRL
OEM, multi-client capable solution	✓	-	-	-	-	-
Central rights management	✓	-	-	✓	-	-
Price per user / per month	5,50 € ¹	12,00 € ¹	12,00 € ¹	90,00 € ¹	12,00 € ¹	12,00 € ²

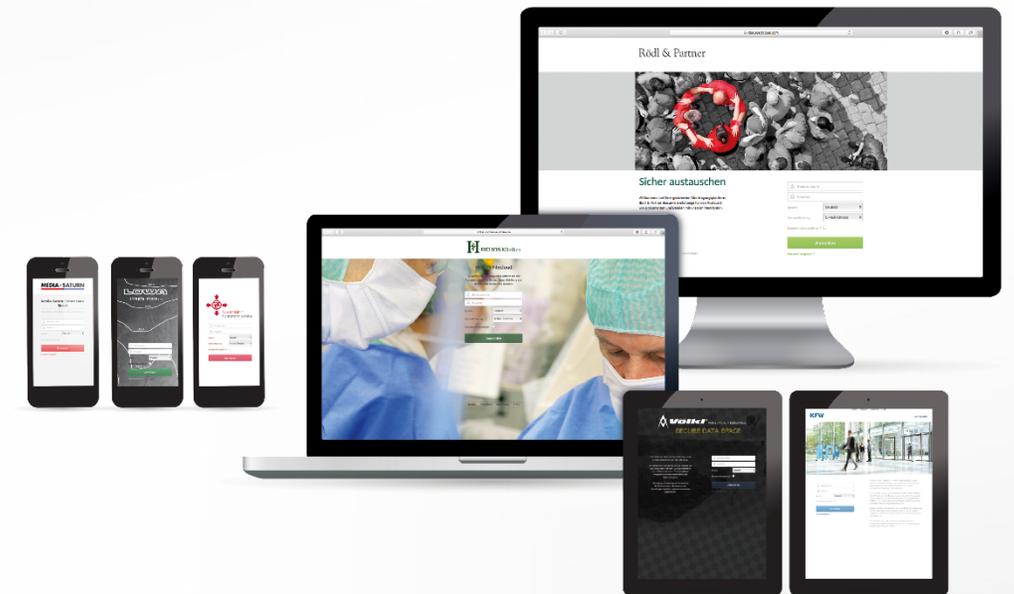

¹ Based on an average price of 50 users and a minimum of 50 GB of total storage, running time 36 months

² OneDrive for Business is included in bundles partly

USE CASE

Summary of the used cases in companies

- › **Highly secure and fast exchange of data**
- › With the integrated **Triple-Crypt® Technology**, files are already encrypted at the client, during the transfer and in the cloud with the highest encryption standards
- › **Any enterprise structure** can be mapped via *Secure Data Space*, *Data Rooms* with individual rights can be created with **any number of sub-levels**
- › **No file limitations at the transmission** of big data, e.g. large pictures, photos, drawings, videos, etc.
- › Sensitive documents and files can be provided via download link, optionally password protected
- › *Secure Data Space* enables **encrypted sending of mail attachments** and relieves the mailservers infrastructure because only sharelinks are sent
- › *Secure Data Space* is also very popular as a place of **project rooms** for all involved users
- › Complete environment in **your own design**

MANAGEMENT TEAM
